Di attrezzi antiscintilla in rame beryllio di Beta Chiave! S.p.A. non devono essere usati a contatto o in presenza di acilene o con apparecchiature che funzionano con acilene.  
 L'acilene può reagire con il rame dello strumento per formare un acilure esplosivo.  
 Beta spark-proof tools cannot be used in contact with acetylene or with devices that function on acetylene.  
 Acetylene can react with the copper of the tool and form copper acetylide, a powerful and very dangerous explosive.
