I Doppi rulli anteriori basculanti e le ruote posteriori girevoli in poliuretano, consentono di poter muovere i sollevatori anche sui grigliati e sono particolarmente indicati per interventi in fase di soccorsi stradali.

Thanks to the double frontal balancing rolls and to the rear turning wheels in polyurethane, these jacks can be moved also on floors with grates and they are suitable during breakdown services.

Grâce aux double rouleaux antérieurs basculants et aux roues pivotantes en polyuréthane on peut déplacer les crics sur des grilles et ils sont particulièrement indiqués pour les interventions pendant les secours routiers

Dank vorderer, kippbarer Doppelrollen und hinterer, drehbarer Räder aus Polyurethan, ist man in der Lage, die Rangierheber auch auf Gitterboden zu bewegen. Sie sind bestimmt geeignet während dem Schleppdienst.
